For All Your Eyecare Needs

Explanation of Contact Lens Evaluation Fees

The charge for evaluating and determining your suitability for contact lens wear is not included in the eye health evaluation fee or refraction fee. An eye health evaluation must be performed prior to the contact lens evaluation. Your insurance plan may or may not cover the cost of the contact lens evaluation. The contact lens evaluation fee is for professional services and **does not include the cost of the lenses**. Contact lens prescriptions are valid for **ONE YEAR** and must be re-evaluated every year to ensure a proper fit, acceptable vision, and good ocular health.

The following products and services are included in the contact lens evaluation fee:

- Professional examination of contact lens fit and power
- Contact lens related follow-up care up to 3 visits within 60 days of your initial exam if needed. ***Subsequent visits may incur fees for contact lens modification exams.***
- Diagnostic pair of contact lenses (if available)
- New contact lens case and trial size solution, or valuable coupon to purchase solution

***** Any follow-up visits to evaluate medical complications of wearing contact lenses will be billed as medical office visits to either the medical insurance and/or the patient. *****

Your evaluation may fall into one of the following categories:

Basic	\$100	Soft Spheres (excluding Monovision)
Advanced	\$140	Soft Torics (Astigmatism)
Complex	\$180	Soft Multifocals and Monovision
RGP	\$250	Rigid Gas Permeable EVAL
New Wearer	\$25	Insertion and Removal Training (in addition to the above fees)

Your contact lens prescription will be given after the initial fitting period is successfully completed (examination, fitting, and follow-up visits) and after **all fees are paid**. Fees for professional services, such as examination fees and contact lens evaluation fees, are **not refundable**.
